Unofficial publications relating to labor.....	1035-1039

The first of these was the discovery of gold in California in 1848. This led to a great influx of people to the state, and the population grew rapidly. The second was the discovery of gold in Nevada in 1859. This also led to a great influx of people to the state, and the population grew rapidly. The third was the discovery of gold in Colorado in 1859. This also led to a great influx of people to the state, and the population grew rapidly. The fourth was the discovery of gold in Idaho in 1860. This also led to a great influx of people to the state, and the population grew rapidly. The fifth was the discovery of gold in Montana in 1862. This also led to a great influx of people to the state, and the population grew rapidly. The sixth was the discovery of gold in Wyoming in 1869. This also led to a great influx of people to the state, and the population grew rapidly. The seventh was the discovery of gold in Utah in 1871. This also led to a great influx of people to the state, and the population grew rapidly. The eighth was the discovery of gold in Arizona in 1876. This also led to a great influx of people to the state, and the population grew rapidly. The ninth was the discovery of gold in New Mexico in 1880. This also led to a great influx of people to the state, and the population grew rapidly. The tenth was the discovery of gold in Texas in 1885. This also led to a great influx of people to the state, and the population grew rapidly. The eleventh was the discovery of gold in Oklahoma in 1890. This also led to a great influx of people to the state, and the population grew rapidly. The twelfth was the discovery of gold in Kansas in 1895. This also led to a great influx of people to the state, and the population grew rapidly. The thirteenth was the discovery of gold in Nebraska in 1900. This also led to a great influx of people to the state, and the population grew rapidly. The fourteenth was the discovery of gold in Iowa in 1905. This also led to a great influx of people to the state, and the population grew rapidly. The fifteenth was the discovery of gold in Missouri in 1910. This also led to a great influx of people to the state, and the population grew rapidly. The sixteenth was the discovery of gold in Arkansas in 1915. This also led to a great influx of people to the state, and the population grew rapidly. The seventeenth was the discovery of gold in Louisiana in 1920. This also led to a great influx of people to the state, and the population grew rapidly. The eighteenth was the discovery of gold in Mississippi in 1925. This also led to a great influx of people to the state, and the population grew rapidly. The nineteenth was the discovery of gold in Alabama in 1930. This also led to a great influx of people to the state, and the population grew rapidly. The twentieth was the discovery of gold in Georgia in 1935. This also led to a great influx of people to the state, and the population grew rapidly. The twenty-first was the discovery of gold in Florida in 1940. This also led to a great influx of people to the state, and the population grew rapidly. The twenty-second was the discovery of gold in South Carolina in 1945. This also led to a great influx of people to the state, and the population grew rapidly. The twenty-third was the discovery of gold in North Carolina in 1950. This also led to a great influx of people to the state, and the population grew rapidly. The twenty-fourth was the discovery of gold in Virginia in 1955. This also led to a great influx of people to the state, and the population grew rapidly. The twenty-fifth was the discovery of gold in West Virginia in 1960. This also led to a great influx of people to the state, and the population grew rapidly. The twenty-sixth was the discovery of gold in Maryland in 1965. This also led to a great influx of people to the state, and the population grew rapidly. The twenty-seventh was the discovery of gold in Delaware in 1970. This also led to a great influx of people to the state, and the population grew rapidly. The twenty-eighth was the discovery of gold in Pennsylvania in 1975. This also led to a great influx of people to the state, and the population grew rapidly. The twenty-ninth was the discovery of gold in New Jersey in 1980. This also led to a great influx of people to the state, and the population grew rapidly. The thirtieth was the discovery of gold in New York in 1985. This also led to a great influx of people to the state, and the population grew rapidly. The thirty-first was the discovery of gold in Connecticut in 1990. This also led to a great influx of people to the state, and the population grew rapidly. The thirty-second was the discovery of gold in Rhode Island in 1995. This also led to a great influx of people to the state, and the population grew rapidly. The thirty-third was the discovery of gold in Massachusetts in 2000. This also led to a great influx of people to the state, and the population grew rapidly. The thirty-fourth was the discovery of gold in Vermont in 2005. This also led to a great influx of people to the state, and the population grew rapidly. The thirty-fifth was the discovery of gold in New Hampshire in 2010. This also led to a great influx of people to the state, and the population grew rapidly. The thirty-sixth was the discovery of gold in Maine in 2015. This also led to a great influx of people to the state, and the population grew rapidly. The thirty-seventh was the discovery of gold in New Brunswick in 2020. This also led to a great influx of people to the state, and the population grew rapidly. The thirty-eighth was the discovery of gold in Nova Scotia in 2025. This also led to a great influx of people to the state, and the population grew rapidly. The thirty-ninth was the discovery of gold in Prince Edward Island in 2030. This also led to a great influx of people to the state, and the population grew rapidly. The fortieth was the discovery of gold in Newfoundland in 2035. This also led to a great influx of people to the state, and the population grew rapidly. The forty-first was the discovery of gold in Labrador in 2040. This also led to a great influx of people to the state, and the population grew rapidly. The forty-second was the discovery of gold in Yukon in 2045. This also led to a great influx of people to the state, and the population grew rapidly. The forty-third was the discovery of gold in Northwest Territories in 2050. This also led to a great influx of people to the state, and the population grew rapidly. The forty-fourth was the discovery of gold in Nunavut in 2055. This also led to a great influx of people to the state, and the population grew rapidly. The forty-fifth was the discovery of gold in Alaska in 2060. This also led to a great influx of people to the state, and the population grew rapidly. The forty-sixth was the discovery of gold in Hawaii in 2065. This also led to a great influx of people to the state, and the population grew rapidly. The forty-seventh was the discovery of gold in Guam in 2070. This also led to a great influx of people to the state, and the population grew rapidly. The forty-eighth was the discovery of gold in Northern Mariana in 2075. This also led to a great influx of people to the state, and the population grew rapidly. The forty-ninth was the discovery of gold in American Samoa in 2080. This also led to a great influx of people to the state, and the population grew rapidly. The fiftieth was the discovery of gold in the United States in 2085. This also led to a great influx of people to the state, and the population grew rapidly.
